

# Adult Kidney Comparisons – Living and Deceased Donors

## Deceased Donor

(Based on 335 patients)

### Will I survive?

Nine of ten adult transplant patients who receive a kidney at UW Health from a deceased donor survive at least one year overall.

This is close to what we expect to see at UW Health and at other transplant centers in the U.S.

### Will my new kidney work?

Nine of ten adult kidneys from deceased donors transplanted at UW Health work at least one year overall.

This is close to what we expect to see at UW Health and at other transplant centers in the U.S.

## Living Donor

(Based on 216 patients)

### Will I survive?

Almost all adult transplant patients who receive a kidney at UW Health from a living donor survive at least one year overall.

This is what we expect to see at UW Health and at other transplant centers in the U.S.

### Will my new kidney work?

Almost all adult kidneys from living donors transplanted at UW Health work at least one year overall.

This is what we expect to see at UW Health and at other transplant centers in the U.S.
